PROJECTS

Udhann [\(Source code\)](#)

- Developed a mobile and web application to streamline international university admissions for Nepalese students.
- Eliminated the need for third-party consultancies by enabling direct communication with universities.
- Created a centralized resource hub for admissions, scholarships, visa guidelines, and language test information.
- Integrated secure document management with OCR-powered scanning using Google Cloud Vision API.

Pharmacy Management App [\(Source code\)](#)

- Developed a mobile pharmacy management app using Flutter with a clean and responsive UI for android and IOS.
 - Implemented Firebase Firestore for real time data handling and secure storage of product customer and order records.
-
